

AGENT PORTAL · NEXT CHAPTER

Add an AI CRM to the Agent Portal

Give every agent a built-in client manager — capture leads, automate follow-up, and close more deals, all inside the portal they already use every day.

Contacts & Pipeline

Automated Follow-up

AI Assistant

Brokerage Analytics

THE GAP TODAY

The portal equips agents — but doesn't manage their clients

Agents are trained, have listings and tools in one place. Yet their actual book of business still lives in phone contacts, spreadsheets, and memory.

**Leads scattered**

Contacts split across phone, email, and notes — no single view.

**Slow follow-up**

Most deals are lost to missed or late follow-ups.

**No pipeline view**

Hard to see which deals are hot or stalling.

**No broker insight**

The brokerage can't see team pipeline or response times.

We already own the agent's daily login. Adding a CRM makes the portal indispensable.

THE VISION

One portal — now it closes deals too

- ✓ Every lead captured the moment it lands
- ✓ A visual pipeline from first call to closing
- ✓ Automated, on-brand follow-up so nothing slips
- ✓ An AI assistant that drafts, summarizes & prioritizes
- ✓ Native to the portal — same login, same branding

AT A GLANCE

Everything an agent needs to manage clients

**Contacts**

One timeline per buyer, seller, or investor.

**Pipeline**

Drag deals through editable stages.

**AI Lead Score**

Know who to call first, automatically.

**Auto Follow-up**

Email/SMS drip sequences & reminders.

**AI Drafting**

Emails, texts & call summaries in a click.

**Tasks & Calendar**

Showings & follow-ups on one calendar.

**Marketing**

Flyers & just-sold posts from a listing.

**Dashboards**

Agent & brokerage pipeline analytics.

A visual deal pipeline — drag, drop, done

Stages are admin-editable — the same control pattern as the portal's pre-con statuses.

Every interaction, on one timeline

Due tomorrow · reminder set.
Upcoming

The AI does the busywork

Drafting, call summaries, lead scoring & "just-sold" posts — powered by an LLM behind our own server (keys never leave the brokerage).

FOLLOW-UP ENGINE

No lead ever falls through the cracks

**Speed-to-lead**

The agent is pinged the second a new lead lands — first to respond wins.

**Drip sequences**

Templated email/SMS steps fire automatically by stage or time.

**Smart reminders**

"Call back in 3 days" tasks with overdue nudges.

**Template library**

Brokerage-approved, on-brand messages ready to send.

**Worksheet capture**

Existing pre-con worksheets auto-create a contact & deal.

**2-way messaging**

Email (and optional SMS via Twilio) logged to the timeline.

Pipeline health for agents and the brokerage

WHY IT'S LOW-RISK

Built on the portal we already run

- ✓ Same React + TypeScript + Tailwind front end
- ✓ Same Postgres database with per-agent security
- ✓ Same Express server for email, AI calls & webhooks
- ✓ Reuses the calendar, calculators & email settings
- ✓ No new vendor lock-in — the brokerage owns all data

New data, cleanly scoped

Contacts, deals, stages, activities, tasks, templates & automations — each agent sees only their own book; admins get the brokerage roll-up.

ROADMAP

Ship value early, layer in AI

PHASE 1**Foundation**

Contacts, pipeline, timeline, tasks, worksheet capture.

PHASE 2**Follow-up**

Templates, drips, reminders, speed-to-lead.

PHASE 3**AI Assistant**

Drafting, summaries, lead scoring.

PHASE 4**Marketing & SMS**

Flyers, just-sold, 2-way texting.

PHASE 5**Analytics**

Agent + broker dashboards.

Phase 1 stands on its own — agents can run their whole book in the portal before any AI is added. AI is the fast-follow that creates the "wow."

THE ASK

Turn the portal into the agent's whole business

- ✓ A real recruiting edge: "free AI CRM included"
- ✓ Agents log in daily — not just for training
- ✓ Brokerage-wide pipeline visibility
- ✓ A new premium package & revenue line

Approve Phase 1 & get the build estimate →
